Introduction

captain jupyter

Abstract

This is my abstract!

I am a book about ... something! Wikipedia has information about books: hover over the link for more information.

> **Note**
>
> Books are usually written on paper ... But Jupyter Book can create *websites*!

If you sold 100 books at $10 per book, you'd have $1000 dollars according to (1). If instead you publish your Jupyter Book to the web for free, you'd have $0 dollars!

$$x \times y = z \tag{1}$$

Sometimes when reading it is helpful to foster a *tranquil* environment. The image in Figure 1 would be a perfect spot!

Figure 1: A photograph of some beautiful mountains to look at whilst reading.
